Presented by
TEMASEK FOUNDATIONOrganised by
SCIENCE CENTRE
singapore**SCIENCE TEACHERS ASSOCIATION OF SINGAPORE****SAAS**

Recommended for Secondary 1 to JC 1 students (13-17 year old)

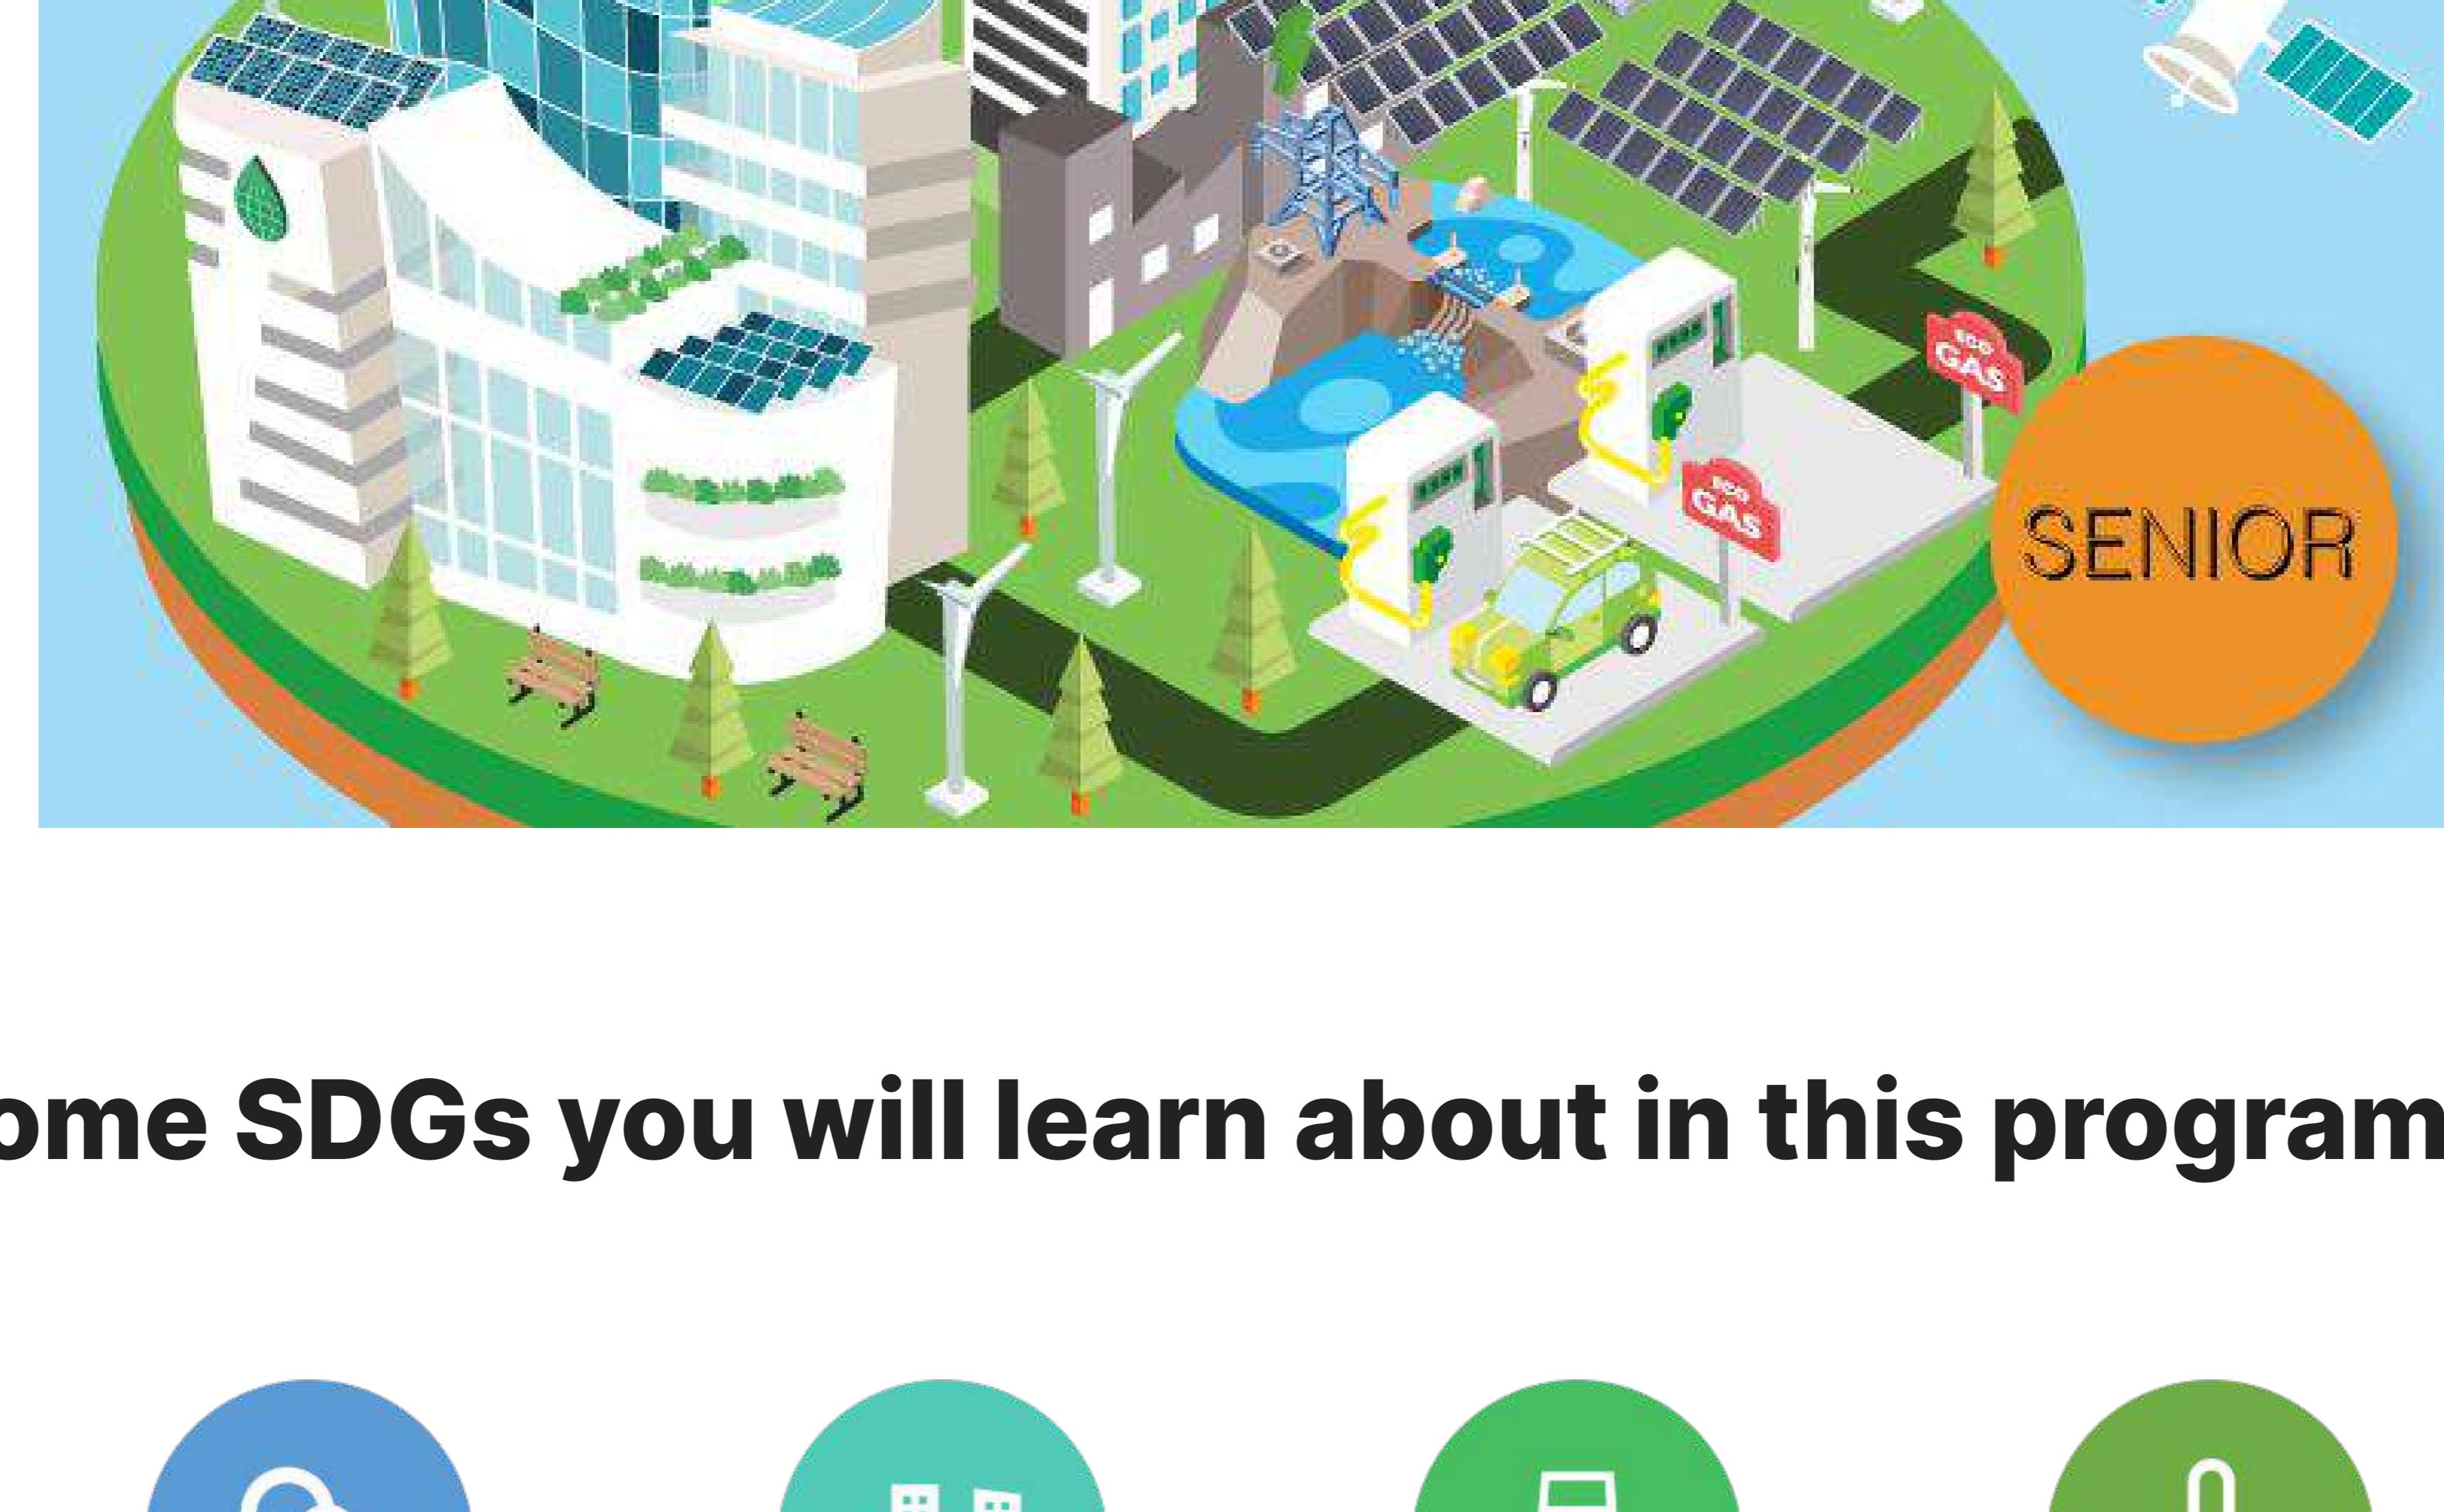

About the programme

On 25 September 2015, leaders from 193 states met at the United Nations to discuss the world's problems and decided on a plan to tackle these issues. They came up with 17 Sustainable Development Goals (SDGs) and set a target to achieve these goals by the year 2030.

The SDGs are an ambitious set of goals that aim to fight inequalities, eliminate extreme poverty and tackle climate change.

In today's world, many people lead a comfortable lifestyle using many products (food, technology, such as mobile phones, gadgets, etc) that makes lives better. But have we thought of where these products come from? We are relying on the Earth's resources and in an unsustainable way. If we do not change the way we live now, we may soon deplete all natural resources available on Earth. The future generations may not get to enjoy what we have today.

To achieve a sustainable society, it is important that everyone plays a part to change, and acquire new habits and practices. What knowledge do we need, and what choices do we have to make in order to achieve these goals? This course will help you to learn about the SDGs, teach them to others and take action to realise them.

Some SDGs you will learn about in this programme

AFFORDABLE AND CLEAN ENERGY (GOAL 7)

SUSTAINABLE CITIES AND COMMUNITIES (GOAL 11)

RESPONSIBLE CONSUMPTION AND PRODUCTION (GOAL 12)

CLIMATE ACTION (GOAL 13)

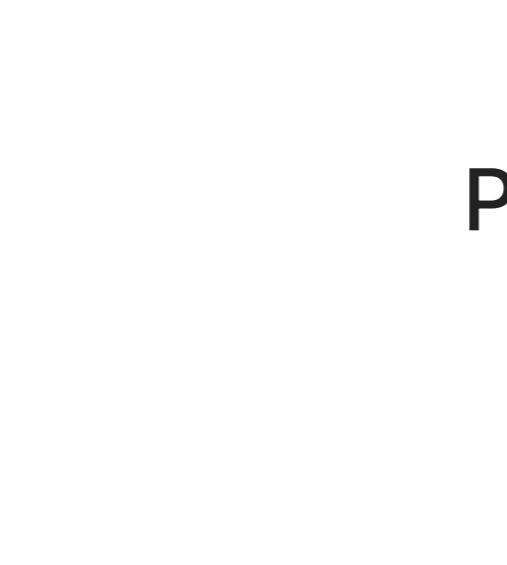

General Instructions

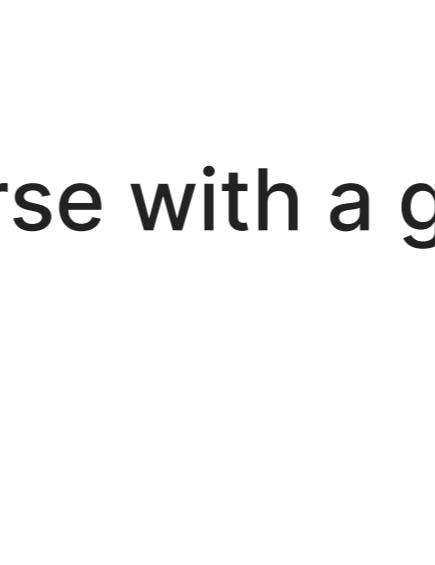

Try to do the tasks independently

Only submit photos of your work.

If you are using sources from the internet, be sure to write them in your own words and cite the source.

If you submit inappropriate content, you will be given a warning and may be barred from the system.

Awards and Certification

Participants who complete the course with a grade of 15 and up will

Receive the I am a Young Sustainability Champion e-certificate

Reducing Plastic Waste

What are some effective ways to reduce plastic waste in our daily lives?

 5  4  15 minutes ago

4 Replies

Oldest first ▾

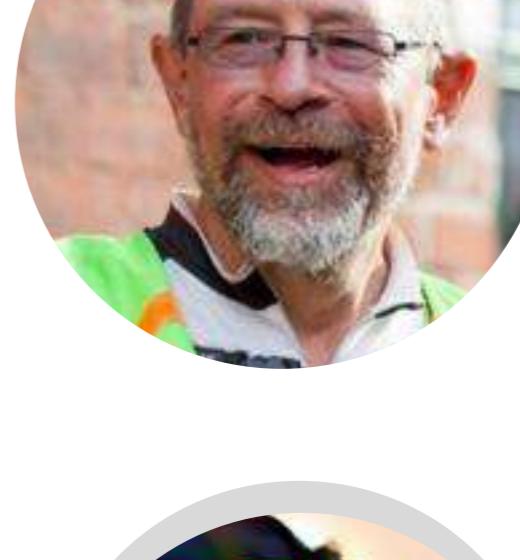

User 1: "I've started carrying my own reusable shopping bags and water bottles everywhere I go. It's a small change, but it really helps cut down on single-use plastics."

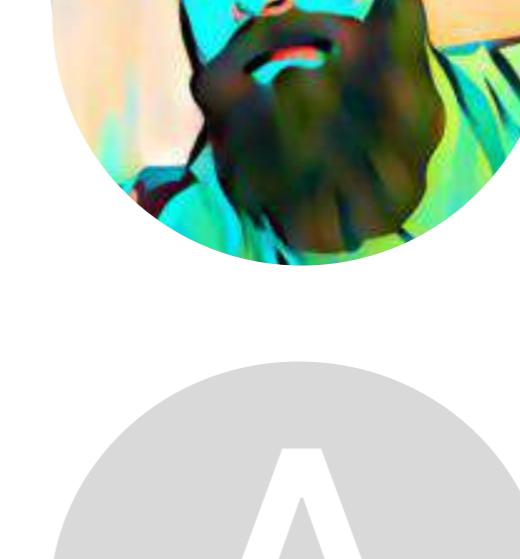

User 2: "That's a great start! I've also switched to using beeswax wraps instead of plastic wrap for food storage. They're reusable and much more eco-friendly."

User 3: "I've been looking into compostable alternatives for plastic items like cutlery and straws. Has anyone tried these? How effective are they?"

User 4: "Yes, I've used compostable cutlery for events, and they work well! They're a bit more expensive but worth it for the environmental benefits."

Managing Notifications

How do I manage and customize notifications on this platform?

5 4 15 minutes ago

4 Answers

User 1: "To manage your notifications, you can go to the settings panel and find the 'Notifications' section. From there, you can choose which activities you want to be notified about. For instance, I only keep notifications on for direct messages and task assignments. You can also adjust how you receive these notifications, like through email or in-app alerts. It's pretty straightforward once you get to the settings."

User 2: "I had the same issue when I first started using the platform. What worked for me was muting the channels and activities that weren't crucial. If you go to the notification settings, there's an option to mute or minimize alerts from specific projects or groups. It really helps to reduce the noise, especially if you're part of multiple teams."

User 3: "There's also a filtering feature that you might find useful. In the notification settings, you can create filters based on keywords or types of activities. For example, I created a filter that only sends me notifications about project deadlines. This way, I stay focused on what's important without getting distracted by less critical updates."

User 4: "One thing to keep in mind is how you want to receive notifications. I found that in-app notifications work better for me during work hours, while I rely on email notifications when I'm on the go. You can set different preferences for each type, which is great for managing how and when you're notified."

**Andrew *** Hello there!!
